

Technical datasheet

OTS. Hydraulic Pressure Testing Unit.800.2,4.

Introduction

The OTS Pressure Testing unit is pneumatically Powered.

A compact unit suitable for small spaced areas and specifically designed, but not limited to, water, chemical, lube- & hydraulic oils for oil and gas production enhancement.

The unit is constructed and approved to meet all requirements of hydrostatic pressure testing using oil or water and of different types of process systems; such as pipes, vessels, heat exchangers, coolers etc.

OTS item number.: 9000-407

Features

- Small unit suitable for small spaced areas
- Fitted with a 5 ltr. oil tank
- Extremely low maintenance requirement
- Ready for hook-up to air supply
- Fitted with 1/4" high pressure connection

Capacity & performance

Air driven pressure	1-7 bar
Outlet pressure at 7 bar	800 bar
Volume	2,4 l/min

Safety features

- Air control unit with pressure regulating valve
- Control pressure gauge and shut-off valve

Weight & dimensions

Length	850 mm
Width	400 mm
Height	680 mm
Gross weight	35 kg
